

Bramble Review

Mathematical preflight report · document version 1 · 2026-07-29

2 source-linked findings	7 checked areas	0 unsupported areas
-----------------------------	--------------------	------------------------

SCOPE AND LIMITATIONS

This report checks internal arithmetic consistency only within the supported and customer-confirmed scope. It does not replace professional technical editing, pattern testing, construction judgement, or the designer's final review.

ASSUMPTIONS USED

Seam allowance	1/4"
Usable WOF	40"
Fabric rounding	1/8 yd
Grid	1 rows × 5 columns
Construction flags	None

FINDING 1 · CRITICAL · PIECE_COUNT_RECONCILIATION v1.0.0

4 Background rectangle pieces are fewer than expected

The cutting total states 36, while the confirmed assembly relationship requires 40.

Formula (quantity per block × block quantity) + deliberate extras Quantity per block: 8 Block quantity: 5 Deliberate extras: 0	Expected 40 Stated 36 Difference 4 fewer than expected
--	--

Source evidence

Page 3: Cut (40) Background rectangles 2 1/2 x 4 1/2 inches.

Page 5: Arrange five 12 inch finished blocks in one row.

Recommended manual action

Check whether the cutting quantity, pieces per block, or block quantity is incorrect.

Background rectangle cut height does not produce its stated finished height

With a confirmed 1/4 inch seam allowance on both sides, the cut height should be 4 1/2 inches.

Formula finished dimension + (2 × seam allowance) Finished height: 4 Seam allowance: 1/4	Expected 4 1/2" Stated 4 1/4" Difference 1/4" fewer than expected
--	---

Source evidence

Page 3: Cut (40) Background rectangles 2 1/2 x 4 1/2 inches.

Recommended manual action

Confirm whether the cut height or finished height label should change.
